RATING OPINION

The assessment concludes that Sample Co. has outgrown founder instinct but has not yet transitioned into institutional systems. It has enough structure to grow — but until knowledge transfer, decision ownership and process visibility strengthen, further growth will create friction rather than momentum.

IMPLICATIONS

- ✓ Growth is achievable from the current position.
- ! Founder dependency remains material.
- ! AI deployed now would reinforce inconsistent processes.
- ✓ Within reach of the ready-to-scale line.

Rating outlook: Positive — conditional on completion of the recommended actions. Review in 90 days.

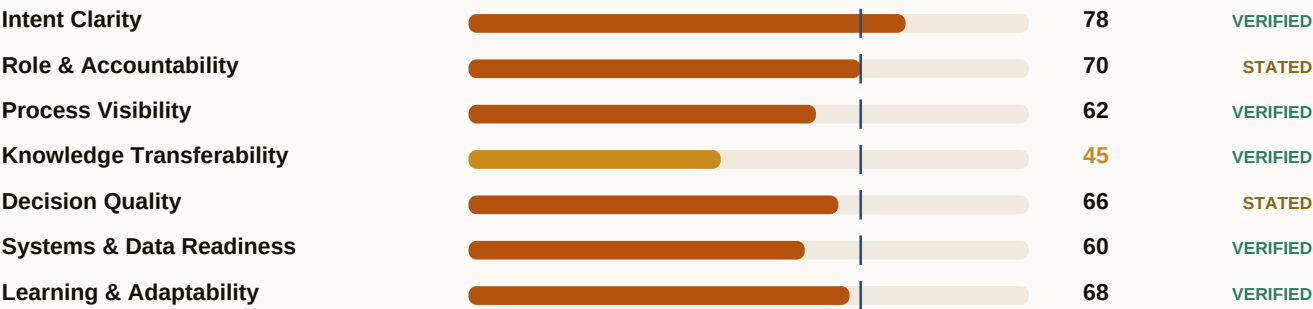

MATURITY SCALE

▲ YOU · 64

Ready-to-scale passmark: 70. Investment-Grade begins at 75. Six points from the passmark.

THE SEVEN DIMENSIONS

Blue line = ready-to-scale passmark (70). Gold Confidence: five of seven dimensions verified against evidence; two self-declared.

FOUNDER-DEPENDENCY SIGNAL · MEDIUM

The hardest-won knowledge still lives in a few heads — the largest constraint on scaling, raising or handing over.

RECOMMENDED ACTIONS

- Document the five processes that live only in people's heads.**
Founder-dep ↓ ~25% · ~2 wks · Medium
- Build one source of truth for the core numbers.**
Systems ↑ ~15 pts · ~3 wks · Medium
- Assign owners to the three decisions that bottleneck at the founder.**
Roles ↑ ~12 pts · ~1 wk · Low

Projected after these three moves: 64 → ~71 — through the passmark. Re-rate in 90 days to verify the climb.

Basis of opinion. Seven dimensions, fourteen inputs; each blends declared (30%), evidenced (50%) and coherence (20%). Methodology published at mapped.africa/method. Limit. A higher rating does not guarantee better business performance — it indicates stronger operational visibility and readiness on the evidence reviewed. Benchmark. Illustrative; a live benchmark publishes once enough verified assessments exist. Data. Held with consent; benchmarking uses anonymised, aggregate form only.
